Selfportrait . body and bread

One body with of a lot of bodies made of bread is going to form a living sculpture.

Passers-by in the public space of Copenhagen are invited to choose one figure, take this figure of bread and pose with it.

We'll take a picture of this situation – so another selfportrait will be created and will go on a journey.

The beginning of this public action was in Graz/Austria in spring 2008. About 70 people took part. Now this public action takes place in Copenhagen and will travel from there to Paris and Vienna.

Next year the whole group of selfportraits will make a journey back to its origin in Graz where you will see each particle in an installation.
